

OUR STORY

2011

We part company and start to develop a better, safer, less component system.

We call it G-DECK

2014

We start trials in Scotland with our first ever business partner called HL Plant.

It's a great success!

2016

2016 sees huge growth as product awareness increases.

A highlight was having G-DECK used on the new American Embassy

2018

We are the first company to develop a hatch used for getting G-DECK from different floors.

We later go on to develop the first ever stairwell hatch too

2020

After 3 years of development we launch our third system called DUAL. Aimed at scaffold and a hybrid system allowing tube & fitting to be utilised together with G-DECK

2006

We develop & manufacture the first metal safety decking system in the market

2013

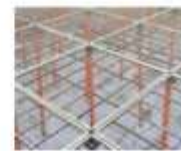

G-DECK passed all tests and our Global patents are approved.

LDS Hire & Sales is registered and we're ready to go

2015

We officially launch G-DECK into the market with no clients, zero sites and one business partner

2017

After 2 years of development we launch our second system called LITE for the prefab market who only need a walk on/work on system.

2019

We have trebled in size year on year, trebled the amount of factories we have and trebled our turnover.

To celebrate we rebrand G-DECK with a refreshing new look

2021

Lot's of think tank already on the way with new product launches planned
